

## Biz Rule Analyzer

Managing business rules in Encompass® can be complex and time-consuming, especially when multiple admins & developers are involved. Biz Rule Analyzer simplifies the process by offering powerful search, visibility, and analysis tools—making it easier to find, edit, and maintain business rules accurately and efficiently.

### KEY FEATURES:

#### Smart Search

Quickly find fields, calculations, and rules across Encompass, all in one easy-to-read screen.

#### Clear Visibility

See the full context and details of rule interactions to minimize errors and miscommunications.

#### Effortless Management

Streamline updates, error diagnosis, and system changes with specialized tools for Health, Settings Reports, and Change Management.

### API VERSION NOW AVAILABLE!

The Biz Rule Analyzer has been completely re-written using the API. The tool can be run along-side the previous SDK version for evaluation and testing.
