

**Introducing the Field Explorer Pro**

Searching for the right field in Encompass, whether it is standard, custom, or virtual, can be frustrating and time-consuming.

Administrators often waste hours digging through spreadsheets or incomplete fieldspreadsheets or incomplete field names when building custom input forms or verifying if a field already exists. Field Explorer Pro simplifies the entire process.

**FIELD EXPLORER PRO****KEY BENEFITS:****Smart Search & Filtering**

Instantly search across all Encompass fields, including those in the Reporting Database, by using partial names or descriptions. Advanced filters are available to quickly narrow down the results.

**Review Field Properties**

Easily view field characteristics like data type, reporting availability, and whether the field already exists. This helps avoid duplication and ensure accuracy when building tools.

**One-Click Export**

Export complete or filtered field lists to Excel for easy reference, sharing, or audit purposes—no more manual spreadsheet updates from EllieMae.
