

MERS Automation

Registering loans with MERS is a required part of the mortgage process, but doing it manually or through third-party bundles can slow teams

down. Lender Toolkit's MERS Automation Plugin enables direct registration from Encompass® without relying on external tools. Once configured, it runs automatically, saving hours of manual work each week and pushing registration details into custom fields for easy tracking.

KEY FEATURES:

Seamless Registration

Automates MERS registration from Encompass® without third-party dependencies.

Custom Triggers

Set field-based rules to control when registration occurs.

Fast & Trackable

Cuts hours of manual work and returns data to custom fields for easy monitoring.

AVAILABLE IN API & SDK VERSIONS

API-based (New): A modern, flexible version available as a separate product in the PowerTools™ suite

SDK-based: Still available for customers who prefer or rely on the original configuration
